Terms & Conditions

Suggested Retail Prices

Suggested retail prices (SRP) are first publicized when a title is first published and serve as guidance in establishing prices through various distribution channels.

The actual price paid by an end customer is established by our distributors.

Prices & conditions subject to change without notice. Shipping costs higher outside the United States.

Science & Humanities Press only handles sales direct to authors as a convenience. Sales to others are through retail outlets such as amazon.com, Barnes and Noble.com and various bookstores that obtain books from our distribution Networks.

In general, a customer may find it best to order directly from amazon.com and take advantage of free shipping for qualifying orders. amazon also frequently allows some discount from SRP to small-quantity retail purchasers.

Resellers can qualify for special discounts when ordering directly from the branch of amazon that does most of our manufacturing. books may also be available with discounts from other extended distribution channels such as Ingram.

Return Policy:

Our books are guaranteed:

If a book has a defect, or doesn't hold up under normal use, you should contact the specific vendor channel from which it was obtained. **C e r t a i n l y**, products with publisher defects (i.e., books with missing pages, etc.) should be returnable but may require authorization and you should contact the manufacturer (probably amazon.com).

Overstock Returns are generally not permitted:

Our experience on overstock returns has been that the accounting churning costs both to us and the customer were more than the privilege was worth. Returning books and ordering more later creates confusion. Returned books are often shopworn. Discount schedules are set to encourage larger quantity purchases, but you should order only what you reasonably expect to sell.
